Concept of Inventory

Accounting Standard 2 (AS-2)

Tangible Property

- 1. Sale in the ordinary course of Business
- 2. In the process for production for sale
- 3. For consumption in the production of goods or services for sale, including maintenance supplies and consumables other than machinery spares

Forms of Inventories:

- 1. Production inventories: raw materials, parts, components used in the production process
- 2. In process inventories: semi finished goods, lying at different stage of production
- 3. Finished Goods inventories: products ready for sale
- 4. Non production inventories : office stores, machine parts, soap, lubricating oil, etc
- 5. Scrap inventories: scraps are also sold as form of inventories

Types of materials

- 1. Direct Materials: materials which are identified with the finished products. Such costs are identified with the finished goods. Wood in furniture, raw cotton for making clothes
- 2. Indirect Materials: small value and do not form part of the finished goods. Nuts, pins, screws, consumable stores, cotton waste etc.

Responsibilities of purchase departments

- 1. To know the exact specification of materials
- 2. To know the sources of such materials
- 3. To continuously search for new sources of supply

Functions of Purchase Department

- 1. Choosing sources of supply.
- 2. Interviewing Suppliers
- 3. Obtaining quotations
- 4. Procuring materials
- 5. Maintenance of records
- 6. Approving invoices

Purchase Procedure

- 1. Receiving request for purchase of materials from stores officers
- 2. Inviting tenders and quotations
- 3. Receipt of quotations from suppliers and selecting the suitable suppliers
- 4. Initiating purchase actions
- 5. Receiving of materials after proper inspection
- 6. Transaction with the suppliers

Purchase Requisition

- 1. Store keeper regularly processes the production level and the store keeper observes that the material has reached the reorder level
- 2. Production planning and control department prepares the bill of materials
- 3. The plant engineer and work manager maintains the capital asset for their construction
- 4. Any other person in charge of the department maintains office stationary, safety measures, painting and cleaning
- 5. Purchase requisition is sent for purchase of material of right quality, quantity, in right time

(f) Bill of Materials: A Bill of Materials is a comprehensive list of all the materials required for a particular job, process or service. It shows the exact specification of materials and quantity required against each item. It gives the details of materials necessary for various purposes. Substitute materials (that may be used when the original materials are not available) are also indicated in the bill of materials. As soon as an order is received, the bill of materials is prepared by the production-planning department with reference to the standardized specifications.
